## Lectures

### DD Solid Connect®

Finally! Our compatible connections with the majority of implants are available. Our user testing is complete. Now we want to put the Prefabs, Ti-bases, Scanbodies and Analogue, together with our partners, on the road. Take the opportunity and learn all about the CAD library, adapter solutions for various machines and about the CAM software integration at our DD summit nineteen. **Our motto: »to enable quality of life, it is important to anchor excellence«, let's put these into practice/action.** We will give important information about the quality standard, safety/security, implementation, functionality and extension for further implant connections. At the End, we talk about the price and regarding its cost-performance the system sets new standards.

### DD contrast®

The start has been made! We put a lot of work into this project. In June, we introduced our new stains and structure mass system in a workshop. Together with Andreas Nolte, who developed the sophisticated system exclusively for us, we were happy about the positive feedback of our DD contrast®. Andreas Nolte will present our DD contrast® in a lecture. He will talk about the features like the minimal layer, the symbiosis with our zirconiaoxides and about the simplicity and economy of this system. The subsequent workshop gives an insight into the handling.

»When you talk about zirconia,  
you go for Dental Direkt«

---

### DD cube ONE ML

- New Multilayer color
- With DD contrast® colors it is easy to adapt the shade from bright to dark
- Mill from an A2 and color it an A3,5 in one firing
- This means less blanks and lean stock keeping. Learn all about the complete zirconia solution

### DD Bio ZW iso color

- The high strength working horse now available in VITA® classical colors
- The perfect basis for porcelain veneering and hybrid abutments and any situation where highest strength is required

### DD cube ONE white

- After the ML blank, we know produce also the white version based on an innovative, European Made powder concept
- In a R&D joint venture with an Austrian Chemical Specilaist, we have developed a complete customized raw material solution
- The basis for the best mechanical behaviour in the class of monolithic zirconia
- Learn all about the new liquid coloring options

### Opaque Liquid

- Addition of the DD shade concept coloring liquids
- Perfect masking of discolored stumps and titanium
- Helps color matching with full contours made of SHT or HAT+ translucent zirconia
- No loss of translucency in the zirconia

## Workshops and Marketplace

### **DD contrast®**

Live demonstration and case solutions with Andreas Nolte and our product managerin Lisa Freiberg. Get to know our international Trainer-Team, which you can book for your national/international exhibitions or events in the future.

### **DD Solid Connect®**

Our team will answer your questions about the use of our implant components. CAD library, CAM software integration, patented holder systems for various machines and DD smart CAM 2.0, the optimal Stand-alone CAM Software solutions.

### **DD shade concept liquids**

Dental Direkt has all answers to all solutions. How to choose the right liquid for the different zirconias? How easy is it to get best masking with »Opaque« Liquid?

### **FAQ corner**

Our Research and Development Team answers questions regarding our material you always wanted to ask. Discuss about daily troubleshooting and optimize your workflow.

### **DiOS® 4.0**

Live scanning with the innovative DiOS 4.0. Let us work together and design successful the digital future of your clinic. Where does the quality and value chain start, how the digital networking of the dentist and the laboratory works and how well Dental Direct products and materials can be integrated into this process. Talk to our CAD-CAM specialists!

### **T500**

Scanning-Tipps and Tricks. Together with our Technology Partner Medit (South Korea) we offer a High-End-Modellscansystem, which fulfills high demands for implant prosthetic planning. We offer more performance at the old price and give with this our dealers and network partners an important competitive advantage.

### **Exocad**

Together with our CAD-CAM specialist you can exchange information about new modules and solutions. Meet our trainers and arrange an individual training lesson in our technology center.
